## Parte A. DATOS PERSONALES

Nombre y Apellidos	Elena Vecino Cordero		
DNI	11934338Y	Edad	55
Núm. identificación del investigador	Researcher ID		
	Scopus Author ID		
	Código ORCID	0000-0002-1672-5132	

### A.1. Situación profesional actual

Organismo	Universidad del País Vasco		
Dpto. / Centro	Biología Celular e Histología / Facultad de Medicina y Odontología		
Dirección	Facultad de Medicina, Departamento de Biología Celular e Histología, 48940, Leioa		
Teléfono	(+34) 680543873	Correo electrónico	<a href="mailto:elena.vecino@ehu.es">elena.vecino@ehu.es</a>
Categoría profesional	Catedrática de Universidad		Fecha inicio   2004
Espec. cód. UNESCO			
Palabras clave			

### A.2. Formación académica (título, institución, fecha)

Licenciatura/Grado/Doctorado	Universidad	Año
Licenciada en Bellas Artes	Universidad del País Vasco	2014
PhD	Universidad de Lund (Suecia)	1996
Doctora en Biología	Universidad de Salamanca	1989
Licenciado en Biología	Universidad de Salamanca	1986

### A.3. Indicadores generales de calidad de la producción científica

## Parte B. RESUMEN LIBRE DEL CURRÍCULUM

Elena Vecino (ORCID ID: 0000-0002-1672-5132) obtained her BSc and PhD in Biology from the University of Salamanca (1986 and 1989, respectively), and a second PhD in the field of vision from the University of Lund (Sweden, 1996). She has collaborated with several European and American Universities. She became a Full Professor of Cell Biology at the University of Basque Country in 2004, where she leads a multidisciplinary group in experimental Neuro-Ophthalmo-Biology ([www.ehu.es/GOBE](http://www.ehu.es/GOBE)), and from 2012, she is a Fellow of Clare Hall, Cambridge (UK). She has published more than 120 peer reviewed papers, directed 15 PhD theses, half of whom were Ophthalmologists, and more than 20 Master's Thesis. Is referee of 10 international research journals and member of the editorial board of the Translational Journal (TVST). She has been Evaluator of European Grants and member of national evaluating agencies (ANEPE; ANECA). She has held more than 70 national and international grants, two of them European, and she has collaborated with several pharmaceutical companies in developing/improving treatments for Glaucoma. The main interests of her research are retinal neuroprotection and the identification of biomarkers in the tear to characterize ocular pathologies. She has developed several animal models of glaucoma that are now used globally to study this pathology. She has been elected by the Univ. of Bordeaux from the Initiative of Excellence (2020) and by the Univ. of Cambridge (UK) Clare Hall College Brain Repair Centre to study the regeneration of the visual nervous system (2012). She has participated in several preclinical trials, including that to ratify the first gene therapy for Retinosis Pigmentaria (in collaboration with Dr Aguirre at U. Penn, USA), and her research has received several prizes from International organizations, including the American Glaucoma Foundation (2004), the First International Prize of ONCE Foundation (2005) and the Alcon Foundation (Prize for Excellence in Glaucoma Research, 2015). She currently holds several grants from pharmaceutical and biotech companies to identify tear biomarkers for neurological and eye diseases, that are at

present in Phase III clinical trial. In addition, Elena Vecino is Bachelor of Fine Arts (2014) with the specialization in sculpture.
