**Part B. CV SUMMARY (max. 3500 characters, including spaces)**

Dr. Luis F. Callado has 25 years of experience in neurochemical studies and functional responses of receptors to psychoactive drugs. His work is focused on neurobiology of receptors and transduction systems in schizophrenia, drug dependence and other psychiatric disorders. Current research involves the neurochemical study of brain receptors and their role in some neuropsychiatric disorders. These studies include the use of radioligand binding techniques, biochemical assays as well as *in vivo* methods. All these techniques and methodologies are currently functioning in his laboratory.

The experience and qualifications of Dr. Callado in the field are clearly represented in the number and level of his publications: to date, he has published 136 papers in high-standard peer-reviewed journals and has presented results at several international conferences. He has on-going research collaborations with several European groups working in neuropsychopharmacology. His current research work is supported by grants funded by the governments of the Basque Country and Spain. He is also the co-IP of the G16 research group of the Centro de Investigación Biomédica en Red de Salud Mental, CIBERSAM.

Dr. Callado is a member of several professional societies, including the Spanish Pharmacological Society, the Spanish Association of Cannabinoid Research, and the Spanish

Society of Drug Abuse Research. He has been involved in the organization of several scientific meetings, and is a reviewer for several journals in the pharmacology and neuroscience areas.

## C.2. Research projects and grants as Principal Investigator:

1. "Evaluation of the endogenous cannabinoid system as a marker of vulnerability to alcoholism". Supported by the Spanish National Plan on Drug Abuse. Ministry of Health. Project 2006I045. 2006-2009. Awarded amount: 48642 €.
2. "Evaluation of the antidepressant activity of new alpha-2 adrenoceptor antagonist molecules". Supported by the Department of Industry, Commerce and Tourism of the Basque Government within the SAIOTEK Program (S-PE08UN01). 2008-2009. Awarded amount: 42276 €.
3. "Study of the therapeutic applications of new alpha-2 adrenoceptor antagonists". Supported by the Department of Industry, Commerce and Tourism of the Basque Government within the SAIOTEK Program (S-PE10UN14). 2010-2011. Awarded amount: 21238.42 €.
4. "Determination of levels of psychotropic drugs in the brain and their correlation with plasma levels". Supported by the Department of Industry, Commerce and Tourism of the Basque Government within the SAIOTEK Program (S-PE12UN033). 2012-2013. Awarded amount: 18752.69 €.
5. "Alterations of the noradrenergic system in cognitive deficits of schizophrenia: localization, mechanisms and pharmacological reversion". Supported by the Spanish Ministry of Economy and Competitiveness. Project SAF2013-48586-R. 01/01/2014-31/12/2016. Awarded amount: 157300 €.
6. General Call for Grants for the acquisition and renovation of scientific infrastructure. Supported by the UPV/EHU 2015. Awarded amount: 51110 €.
7. Neuropsychopharmacology research group of the UPV/EHU, included in the CIBER of Mental Health, CIBERSAM, (G16). Supported by the Carlos III Health Institute. Ministry of Health. Co-IP since 2017. Awarded amount: 423205 €.
8. "Susceptibility to alcohol dependence, a role for the matricellular protein hevin". Supported by the The European Foundation for Alcohol Research. 01/01/2019-31/06/2021. Awarded amount: 70000 €.
9. "Discovering the molecular mechanisms underlying the cannabis-induced increased risk of schizophrenia". Supported by the Spanish Ministry of Science and Innovation. Project PID2019-106404RB-I00. 01/06/2020-30/06/2024. Awarded amount: 130680 €.
10. Call for Grants to support the activities of the research groups of the Basque University System 2022-2025. Education Department. Basque Government. Type A (IT512-22). 01/01/22-31/12/25. Awarded amount: 502425€.
