All my working life I have developed, at the Institute of Physics and Engineering at Low Temperatures, National Academy of Sciences of Ukraine, Kharkov, Ukraine (20 years) and at the University of the Basque Country / Euskal Herriko Unibertsitatea (18 years) doing research applied character in magnetic materials and teaching in the last 2 years postgraduate teaching (master). I am the member of the Group of magnetism of the UPV / EHU directed by the University Professor Julián María González Estévez.

Last 20 years my research was carried out in the magnetic microwires with glass coating, paying special attention to the surface structure more important for application of sensors. I focus mainly on the magneto-optics technique that allows analyzing the magnetic surface structure.

I am author or co-author of 1 book, chapters of books (6), articles in scientific journals (more than 120), participation in more than 100 scientific conferences, director of 1 doctoral thesis, evaluator for national and foreign agencies, evaluator of articles for high impact index journals, member of the international congress organizing committee (9), number of research sexenios - 3, last awarded date - 2015, number of doctoral theses addressed 1, index H 15, total publications in first quartile Q1 - 62, total appointments - 540, average number of appointments / year during the last 5 years - 112.
