Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

I have dedicated my career so far to the search of pharmacogenomics markers to improve the treatment of pediatric oncology patients. During my PhD training and subsequent postdoctoral experience in Prof. Africa Garcia-Orad's lab at the UPV/EHU (Spain), my main focus was on genetic variants associated with adverse drug reactions and response in pediatric acute lymphoblastic leukemia and osteosarcoma patients. I was able to find SNPs associated with drug toxicity studying candidate genes in methotrexate and vincristine pathways. Additionally, I was the first author in the first study to show that polymorphisms in miRNA processing genes are associated with toxicity after treatment in cancer patients. Later, in the context of my work as a postdoctoral fellow at St. Jude Children's Research Hospital (USA) under the direction of Dr. William Evans, I was able to analyze genome-wide expression and regulation (miRNAs, methylation, SNPs and copy number alterations) in association with methotrexate response in acute lymphoblastic leukemia patients. This helped me improve my bioinformatics skills for the analysis of big data. I have recently incorporated as a researcher in the group of "Genetics and Epigenetics of complex diseases", under the direction of Dr. Idoia Martin, to be in charge of the research line of pharmacogenetics in childhood ALL.

As a result of this work, I have published a total of 43 peer-reviewed papers. I have delivered over 90 presentations at national and international conferences; I have participated in 21 funded research projects, being the PI in two of them, and nowadays participate in a European COST action for the study of leukemia, being leader of Short Term Scientific Missions; I have obtained 2 postdoctoral (Fellowship for recent Doctors until their integration in postdoctoral programs, UPV/EHU, and Postdoctoral fellowship, Basque Government) and 2 predoctoral (Introduction to the Investigation fellowship, RTICC, and Predoctoral fellowship, Basque Government) competitive fellowships, 5 travel grants to perform research stays or attend scientific conferences and 2 grants for the inscription in scientific courses; I have been awarded 1 best oral communication prize (VI Congreso Sociedad Española de Farmacogenética y Farmacogenómica, 2013), 2 best poster presentation prizes (IV Congreso Sociedad Española de Hematología y Oncología pediátrica, 2011; IIIrd EuroEspes Annual Conference, 2008), and 1 best student poster presentation as supervisor (VI Congreso Sociedad Española de Farmacogenética y Farmacogenómica, 2013).

Regarding my teaching and mentoring experience, I am Assistant Professor at UPV/EHU and participated as Adjunct assistant professor at Rhodes College (Memphis, TN, USA). I have also mentored 7 Degree students and 2 masters students and I have directed 1 Doctoral thesis. Regarding outreach actions, I have published 5 scientific dissemination articles, collaborated in the organization a public science fair for 3 years, acted as member of the Organizing Committee of the VI Congreso SEFF and of the 1st meeting of the COST Legend, and delivered clinical sessions to bring the lab research to the clinic.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

I have an h-index of 17.

I have published 43 articles in peer reviewed journals, which are cited 667 times by 500 documents, 13 of them as a first-author or first-coauthor and 7 as last or corresponding author. 26 of those publications are published in journals included in the Q1 of their respective areas, 12 in the Q2, and 4 in the Q3. In addition, I have published 1 book chapter and 5 dissemination articles.
