

Curriculum Vitae

Enrique Rico Ortega

I have been actively performing physics research for the last 15 years. I finished my physics degree at the Universidad Autónoma de Madrid (Spain) with final year collaboration in the group of Prof. F. Sols in theoretical condensed matter physics, on entanglement in Bose-Einstein condensates.

With the work on my PhD thesis "Entanglement in (1+1)-dimensional systems", under the supervision of Prof. J.I. Latorre, I became an expert in the theoretical aspects of quantum information and strongly correlated quantum systems.

During my post-doc research career, I have been working in the field of theoretical quantum physics in a broad scope of topics ranging from quantum link models and the preparation of exotic topological states in open systems to implementations of lattice gauge theories using ultra-cold atoms. I have made key contributions to a large number of projects and the ideas from my research with my collaborators have opened new directions to several timely topics in quantum physics in condensed matter, atomic-molecular-quantum optics physics, and beyond. To give an example, in my recent work on quantum simulation of lattice gauge theories, with my collaborators, we have put forward a very exciting new approach to fundamental problems of high-energy physics. A characteristic of my work is that I always try to bring research subjects and ideas acquired and developed at one place to the next one. For instance, my previous work on valence bond states initiated some successful project in the group of Prof. Dr. H.J. Briegel when moving to Innsbruck. When going to Ulm and later to Strasbourg, my expertise on quantum optical implementations of lattice gauge theories was an important contribution to the work in these groups.

I have also experience in teaching. I have given several courses in Innsbruck and Strasbourg and have guided a number of graduate and doctoral students in their work.

Recently, I have moved to Bilbao in the group of Prof. Dr. E. Solano with the highly competitive and prestigious Ikerbasque research fellow position.

To summarize, during my research career, I have very successfully demonstrated my international standing in theoretical quantum physics, my abilities to carry out original, independent research at the cutting edge of science, and to design and conduct major research projects.

Personal details

Nationality: Spanish

Researcher unique identifier(s):

[Scopus Author ID: 56209503700](#)

[ResearcherID: H-7173-2015](#)

[orcid.org/0000-0003-4414-6821](#)

Education

2014 HDR – Habilitation to supervise research. Strasbourg University, France

2005 PhD in Physics. Universidad de Barcelona, Spain. Advisor: Prof. Dr. J.I. Latorre

2001 Physics degree. Universidad Autonoma de Madrid, Spain

Current position

2015 – Now Ikerbasque Research Fellow
University of the Basque Country UPV/EHU, Bilbao, Spain

Professional experience

2014 – 2014 Postdoctoral Researcher
Laboratory of Quantum Physics, ISIS, Universite de Strasbourg, France

2013 – 2013 Wissenschaftliche Mitarbeiter
Institute for Quantum Information processing, Ulm University, Germany

2010 – 2012 Junior Scientist
Institute for Theoretical Physics, Innsbruck University, Austria

2008 – 2010 Assistant Researcher
Physics Faculty, University of Vienna, Austria

2005 – 2008 Assistant Researcher
Institute of Quantum Optics and Quantum Information, Innsbruck University,
Austria

Scientific visits

1. Deutschen Elektronen-Synchrotron (DESY) Hamburg, Germany. Scholarship at the HERA-B project for the study and analysis of the decay vertex of a J/Y in a pair lepton-antilepton. Work involved in the CP violation research and B-meson physics. (2002). Two-month.
 2. Dept. App. Math. and Th. Physics (DAMTP) Cambridge, UK. Three-month visit in the group of Quantum Information of Prof. Dr. A. Ekert. (2003). Three-month.
 3. Groupe de Ph. Solid Paris VI, Univ. Pierre et Marie Curie, France. Collaboration with Prof. Dr. J. Vidal in the study of quantum correlations on condensed matter models. (2004). One-month.
 4. Dept. App. Math. and Th. Physics (DAMTP) Cambridge, UK. Three-month visit in the group of Quantum Information of Prof. Dr. A. Ekert. (2004). Three-month.
 5. Center for Quantum Technologies (C.Q.T) National University of Singapore (N.U.S.), Singapore. Collaboration to study symmetries and duality transformations in topological order systems and non-abelian gauge models. (2009). One-month.

Teaching and supervision of graduate students

1. Jan. 2004 - Jun. 2005. Dept. E.C.M. at Univ. Barcelona, Spain. Supervision of the courses in Mathematical methods in Physics and in Fundamental Physics.
 2. Oct. 2005 - Feb. 2008. Dept. Th. Physics at Univ. Innsbruck, Austria. Lecture in Quantum Information in Condensed matter systems, Quantum Information for Computer Scientist. Supervision of the courses in Classical Electrodynamics and Mathematical methods in Physics.
 3. Sept. 2014 – Dec. 2014. Lab. Quantum Phys., Strasbourg, France. Lecture in Condensed matter and Many-Body systems.
 4. Oct. 2015 – Jun. 2016. Bachelor's thesis supervision [A. Irastorza "Quantum

- Computation with Superconductors"]
5. Oct. 2016 – Jun. 2017. Bachelor's thesis supervision [R. Asensio Perea "Quantum Simulation of spin models with Circuit QED"]
 6. Oct. 2016 – Jun 2017. Master's thesis supervision [M. Peidro "Quantum Simulation of Topological models with Superconducting Circuits"]
 7. Oct. 2017 – Jun. 2018. Master's thesis supervision [R. Asensio Perea "Quantum Simulation of Topological Quantum Matter"]

Memberships of scientific societies

2015 – Now Member, "Spanish Royal Society of Physics"

Scientific management

1. Research project: Teoria de la Informacion Cuantica: entrelazamiento, algoritmos, criptografia y decoherencia. (2004-2007) Ministerio de Ciencia y Tecnologia.
2. Research project: SCALA (Scalable quantum computing with light and atoms). (2005-2010) OEAW.
3. Research project: NAME-QUAM (Nanodesigning of Atomic and MolEcular QUAntum Matter). (2010-2011) OEAW.
4. Research project: StratUp Ikerbasque (2015-2019) 14000€. Ikerbasque Foundation.
5. Research project: EHUA15/17 (Algoritmos cuanticos con metodos analogico-digitales). (2015-2017) 3104€. UPV/EHU.
6. Chair local organizer, "International Workshop on Ultra-Strong Light-Matter Interactions: theory and applications to quantum information", 19-21 September 2016, Bilbao, Spain. (UPV/EHU grant: 4000€, Basque government grant: 3000€, IQC Canada grant:5500€) [<http://www.qutisgroup.com/workshop-on-ultra-strong-light-matter-interactions/>]
7. Outreach: Pint of Science 2016-2019, Bilbao, Spain. [<https://pintofscience.es/events/bilbo>]
8. Chair local organizer, "International Workshop on Quantum Simulation & Computation: Advantage, Scalability, and Verification", 12-16 February 2018, Bilbao, Spain. (UPV/EHU grant: 3000€, Basque government grant: 4000€, IQC Canada grant:6300€) [<http://qsc2018.hbar.es/>]
9. Local organizer, "Cold Atom Workshop 2018" November 16-17, 2018, Bilbao, Spain. [<https://www.ehu.eus/en/web/cawbilbao/>]
10. Chair local organizer, "International Workshop on Quantum Simulation: Gauge Fields, Holography, and Topology", 10-12 July 2019, Bilbao, Spain. [<https://sites.google.com/view/quant-sim-ght>]

The results of my research have appeared in a number of high-profile publications, including Nature Physics, Physical Review X, Physical Review Letters or Annals of Physics with several publications with more than 100 citations and with an average of more than 100 citations per publication. In some of these works, I was first author or the only author. The ideas, proposals, and works have been disseminated in a series of talks at international conferences and visits of research groups (more than 70 talks, seminars and presentations).

Citations indices: Number of Articles 35, Citations 4347, h-index 19, and i10-index 25.
